**Shipping weight: 300 lbs**

**Unit requires 12" clearance from wall**

## World's Largest Counter Top Batch Freezer

Known by the industry to be the workhorse behind many successful ice cream stories, this machine will run day-in and day-out with minimal maintenance.

The CB-350 is easy to assemble, easy to operate, easy to disassemble and easy to clean.

The CB-350 can make homemade ice cream, super premium ice cream, gelato, frozen yogurt, custard, dairy free ice cream, cream ices, fresh fruit sorbets, frozen lemonade, Italian ice and sherbet.

Unlike our competition, we encourage you to add ingredients like cookies, nuts, candies and fresh fruits directly into the machine. This, of course, allows you to make the best ice cream possible making your products superior to your competition's.

The CB-350 is an air cooled machine and requires 20 amps of 208-230/1/60 or 50

## IOC ( Infinite Overrun Control )

The IOC includes 12 different presets that allow you to select the right dasher speed to create the perfect overrun and texture for your frozen dessert creations. It even has a manual speed setting that will allow you to choose the exact dasher speed of your choosing.

There are videos for Setup, Operation, Maintenance and Troubleshooting. Using these videos to train your staff will ensure consistent practices throughout your operation, and increased efficiency by answering questions to keep your machine up and running.
